

Software Developer Task

Task

- A QR code is provided below, scan it and go through the app it links to. Build a working MVP of that app.

Deliverables

- **Live Deployment URL:** A working link to the hosted MVP clone that completely replicates the functionality and flow of the target application.
- **GitHub Repository:** Public access to a clean, well-commented codebase showing your component structure and state management.
- **Video Walkthrough:** A short video showing the working app and its full flow.

Put all this in a doc and submit
